What does Cochrane do?

Cochrane gathers and summarizes the best evidence from research producing systematic reviews and meta-analysis including only Randomized Controlled Trials (RCTs).

Cochrane does not accept commercial or conflicted funding.
Cochrane Organization

**Review Groups**: systematic reviews (56)

**Methods Groups**: development of methods for reviews (17)

**Centres**: local knowledge translation
  - >52 countries & regions
Cochrane Fields (11)

Focus on dimensions of health care other than a condition or topic

- the setting of care (primary care)
- the type of consumer (children, older people)
- or the type of provider (nursing).

Cochrane Rehabilitation focuses on a specific health strategy.
Role of Cochrane Fields: a bridge

- facilitate work of Cochrane Review Groups
- ensure that Cochrane reviews are both relevant and accessible to their fellow specialists and consumers

Vision of Cochrane Rehabilitation

All rehabilitation professionals can apply Evidence Based Clinical Practice

Decision makers will be able to take decisions according to the best and most appropriate evidence
Goals

1. To connect stakeholders and individuals involved in production, dissemination, and implementation of evidence based clinical practice in rehabilitation, creating a global network

2. To undertake knowledge translation for Cochrane on reviews relevant to rehabilitation, with dissemination to stakeholders, in line with Cochrane’s knowledge translation strategy

3. To develop a register of Cochrane and non-Cochrane systematic reviews relevant to rehabilitation
Goals

4. To promote Evidence Based Clinical Practice and provide education and training on it and on systematic review methods to stakeholders

5. To **review and strengthen methodology** relevant to Evidence Based Clinical Practice to inform both rehabilitation and other Cochrane work related to rehabilitation and stimulating methodological developments in other Cochrane groups

6. To promote and advocate for Evidence Based Clinical Practice in rehabilitation to other Cochrane groups and wider rehabilitation stakeholders

Review Database Committee

Goal 3. To develop a register of Cochrane and non-Cochrane systematic reviews relevant to rehabilitation

“Tag” rehabilitation reviews within (and out of) the Cochrane database

The reviews are initially being tagged in three categories
• professional group
• health condition
• intervention type

At a later date, outcome categorised on the basis of ICF

Chair: William Levack
Co-Chair: Farooq Rathore
Comunication Committee

Goal 2. To undertake knowledge translation for Cochrane on reviews relevant to rehabilitation, with dissemination to stakeholders, in line with Cochrane’s knowledge translation strategy

Disseminate the available Cochrane evidence within the PRM community, other relevant health professionals, consumers and the public

Website, Newsletter, Twitter, Facebook, YouTube channel, Blogshots

Chair: Francesca Gimigliano
Co-chair: Carlotte Kiekens

Methodology Committee

Goal 4. To **review and strengthen methodology** relevant to Evidence Based Clinical Practice to inform both rehabilitation and other Cochrane work related to rehabilitation and stimulating methodological developments in other Cochrane groups

Focus on Methodological problems in PRM
- RCTs are difficult to conduct
- Complex interventions
- Behavioural components of interventions
- Measurement systems
- Use of the ICF framework in research
