

Jody-Anne Mills is a consultant in the Rehabilitation Programme in the Department of Noncommunicable Diseases at the WHO Headquarters in Geneva, Switzerland, where she specializes in issues related to workforce and rehabilitation in emergencies. A South African-born Australian national, she came to WHO in 2015 to work with the WHO Emergency Medical Team (EMT) Initiative, where she led the development of rehabilitation technical standards and recommendations for EMTs. She subsequently joined the Rehabilitation Programme, where she supported the establishment of the Rehabilitation 2030 Initiative and Call for Action. Within her role, she is responsible for the development of tools and resources for strengthening rehabilitation in countries, provides technical support to Member States and continues to support the integration of rehabilitation within the Organization's emergency response, including to the COVID-19 pandemic.

Prior to joining WHO, Jody-Anne worked as an occupational therapist in Australia, Togo and the United Kingdom within the areas of orthopaedics, plastics, burns and spinal cord injury. She completed a Master of International Public Health (MIPH) from the University of Queensland in Australia in 2015 and is currently completing her PhD in the development and application of a Rehabilitation Competency Framework at the University of Sydney Faculty of Medicine.
