● WORK EXPERIENCE

12/2017 – CURRENT Milano, Italy

RESEARCHER IRCCS FONDAZIONE DON CARLO GNOCCHI

Research activities focused on the production of scientific articles in the field of rehabilitation. Specifically, production of systematic literature reviews through: identification of the research question, production of the search string and searching major biomedical databases, evaluation of articles, extraction, analysis and interpretation of data, critical appraisal of articles, and final manuscript writing.

In recent years, I have been particularly interested in the production of search strings for searching major biomedical databases and the methodology required to conduct systematic reviews.
