Cochrane Rehabilitation

Launched in December 2016 is a Cochrane Field.

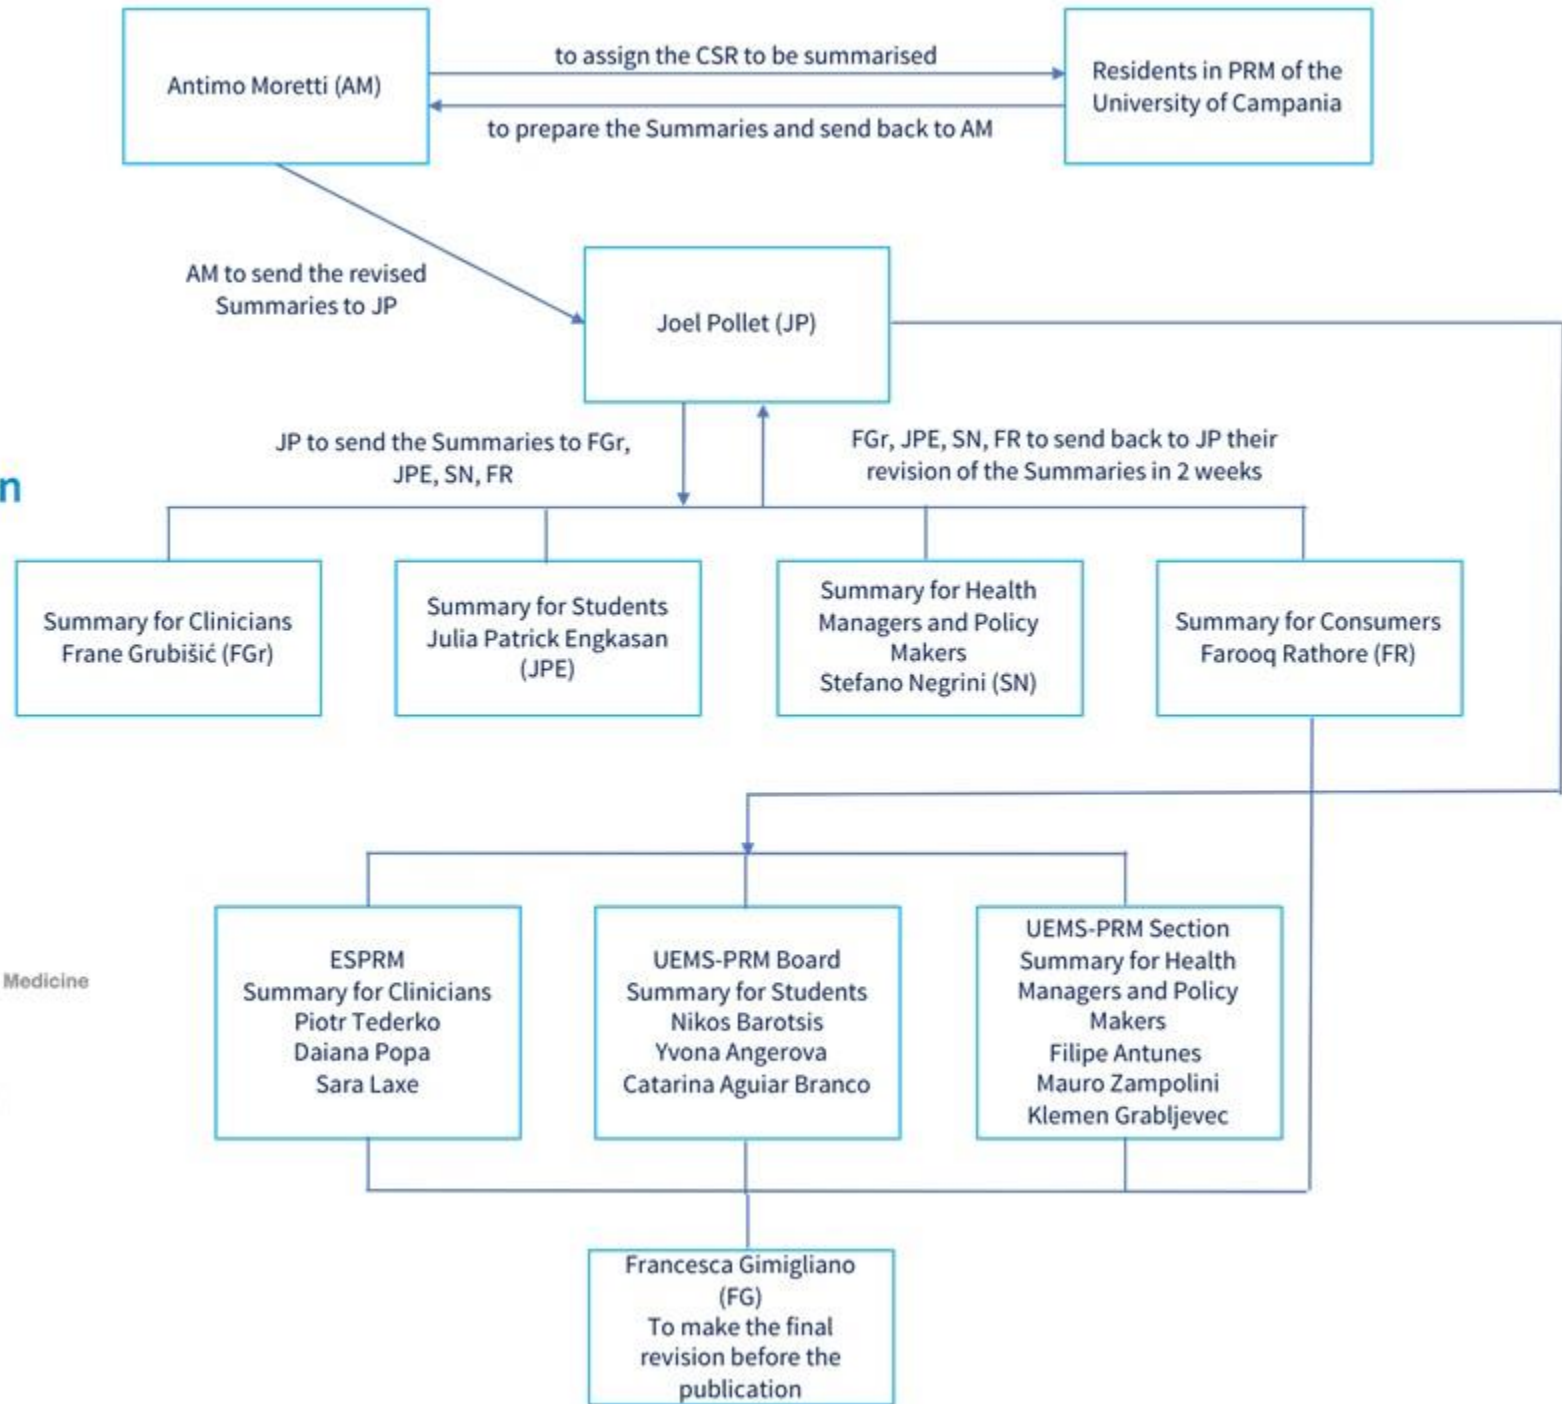

It's a multidisciplinary team composed by 5 committees and an headquarters team, with different aims and responsibilities.

The principal aim of the field is knowledge translation.

The production of an ebook fits perfectly with this aim, as it provides synthetic and easy-to-use messages on the best evidences available (Cochrane Systematic review

The ebook production chart

Rehabilitation Review selection

Is performed by the Reviews Committee, one of the 5 committees of Cochrane Rehabilitation.

‘Taggs’ the Cochrane reviews relevant for the Rehabilitation field

894 Cochrane reviews have been tagged from 1996 to August 2018.

The process is still ongoing to constantly update the results.

Preliminary results of this process have just been published:

Magnus Levack WM, Rathore FA, Pollet J, Negrini S. One in 11 Cochrane reviews are on rehabilitation interventions, according to pragmatic inclusion criteria developed by Cochrane Rehabilitation.

Arch Phys Med Rehabil. 2019 Mar 1.

Trusted evidence.
Informed decisions.
Better health.

Electromechanical-assisted training for walking after stroke

Reference	Reference: Mehrholz J, Thomas S, Werner C, Kugler J, Pohl M, Elsner B. Electromechanical-assisted training for walking after stroke. Cochrane Database of Systematic Reviews 2017, Issue 5. Art. No.: CD006185.
Abstract	
Plain language summary	DOI: 10.1002/14651858.CD006185.pub4
Summary for clinicians	Authors: Mehrholz J, Thomas S, Werner C, Kugler J, Pohl M, Elsner B
Summary for students	
Summary for health managers	Group: Cochrane Stroke Group
Summary for consumers	

- Diseases:**
[2. Neurological > 2.3 Cerebrovascular Disorders](#)
[2. Neurological > 2.8 Spasticity](#)

- Interventions:**
[Rehabilitation in general](#)
[Exercises](#)
[Physical modalities](#)
[Assistive technologies](#)
[Technological interventions](#)

More like this

- [Stretch for the treatment and prevention of contractures](#)
- [Repetitive task training for improving functional ability after stroke](#)
- [Interventions for treating anxiety after stroke](#)

Numbers reached and to reach

Our aim is to create summaries on 320 Cochrane reviews.

At the moment we have finalised 52 summaries.

We are working on another package of 46 summaries.

We are working to implement the production and reach the goal in March 2020.

The ebook will be free available for all and will be a useful tool to spread certified evidence in a fast and practice way!

Thank you!

Founding: The whole project has been founded by the European Bodies of PRM (UEMS-PRM Board and Section, ESPRM and EARM).

Acknowledgements: The residents of the University of Campania 'Luigi Vanvitelli' who wrote all the summaries.
